Sanitizing Your Workplace

Getting your workplace ready for COVID-19

Keeping a properly cleaned environment is key to safely opening back up. Make your plan to clean and disinfect and lower the risk of spreading infection

Workplace Safety Tips from the CDC

- Wear reusable or disposable gloves for routine cleaning and disinfection.
- Clean surfaces using soap and water, then use disinfectant.
- Cleaning with soap and water minimizes germs, dirt, and impurities on surfaces. Disinfecting kills germs on contact.
- Practice routine cleaning of frequently touched surfaces. High-touch surfaces include: tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.
- EPA-registered household disinfectants are recommended.
- Follow label instructions to ensure safe and effective use of disinfectants. Read the [EPA's infographic](#) for detailed guidance on proper disinfectant applications.
- For more information on protocol visit the [CDC](#).

Do You Have a Large Area to Maintain?

Call City Safe Partners to expertly disinfect and keep your space clean and safe as set forth by the CDC.

We will go above and beyond the normal scope of janitorial service to prepare your space for a healthy and productive tomorrow.

Lower the risk of spreading infection to yourself and your employees, customers, and families. Feel confident and at ease in your environment.

See the [CitySafe Partners](#) catalog for PPE and cleaning services best for you.
